Akash Kumar **Singh**

FINAL YEAR UNDERGRAD · INDIAN INSTITUTE OF TECHNOLOGY KANPUR

☐ (+91) 7318019013 | ✉ ksakash@iitk.ac.in

Education

2021	**Indian Institute of Technology Kanpur**, BT-MT, Electrical Engineering | MT CPI: 6, BT CPI : 8/10	*Kanpur, India*
2016	**D.A.V. Public School, NTS Barkakana, C.C.L.**, CBSE, class 12th | Result: 93.4%	*Ramgarh, India*
2014	**D.A.V. Public School, Urimari**, CBSE, class 10th | Result: 10 CGPA	*Hazaribagh, India*

Work Experience

Google Summer of Code, RoboComp
IITK, Kanpur, India

SOFTWARE DEVELOPER | MENTORS: LUIS J. MANSO, ESTEBAN MARTINENA AND RAMON CINTAS *June - Aug 2020*

- The project aimed to port the code of a C++ library, **innermodel** (used to represent virtual environments for a simulator), to Python to make it easy for the developers to use.
- Used **PyBullet** as the rendering engine and **Numpy** to create a customized math library for the calculations in simulation.
- Added **ROS2 middleware** support to **robocompdsl**, a tool to generate boiler plate code for robotic component having different interfaces (sensor, actuators, etc.).

Google Summer of Code, RoboComp
IITK, Kanpur, India

SOFTWARE DEVELOPER | MENTORS: MARCO A GUTIÉRREZ AND RAMON CINTAS *May - Aug 2018*

- The project aimed to integrate **RoboComp**, a robotic framework, with a 3D robotic simulator, **Gazebo**, using **zeroc-ice** as a communication middleware.
- Used **Gazebo plugins** for robotics interfaces, corresponding to different sensors and actuators, to communicate with the Gazebo simulator.
- The integration is expected to allow developers more options from the framework and provide a better simulation with a more realistic physics engine.

Reseach and Technology Center (RTC), Robert Bosch
Bangalore, India

RESEARCH INTERN | MENTOR: GURUPRASAD M. HEGDE *May - July 2019*

- The project aimed to improve the performance of semantic segmentation on 2D RGB images using data from **LiDAR point clouds** for an **autonomous driving car**.
- Trained **Pointnet++ network** on **CARLA** & **Apolloscape** datasets and developed a framework to combine the results of a model trained on 2D RGB images and a model trained on 3D point clouds to perform semantic segmentation on a 2D RGB image.
- Implemented a **Fast LiDAR point cloud segmentation algorithm**, to get clusters in LiDAR point clouds for an autonomous driving car to infer accurate pose of objects in a scene.

New York Office, IIT Kanpur
IITK, Kanpur, India

FRONT END DEVELOPER | TEAM LEAD: PROF. MANINDRA AGARWAL *May - July 2018*

- Worked as a front end developer to develop new features and improve **UI/UX** of a scalable web application.
- Used latest technology stacks like TypeScript in Angular 6 as well as HTML and SCSS for styling.

Projects Undertaken

Bellman optimals vs human optimals
IIT Kanpur

GUIDE: PROF. NISHEETH SRIVASTAVA *Aug - Nov 2018*

- The central idea was to **compare human path-finding** with the **Bellman-optimal solution** found via value iteration, across various factors, in a stochastic two-dimensional grid world.
- Developed a **Graphical User Interface** to collect data via experiment on how humans choose an ideal path based on intuition and, analyzed the data collected to calculate the cognitive bias people have, along with different measures.
- Analyzed the data collected to calculate the cognitive bias people have, along with different measures.

AUV-IITK, IIT Kanpur
IIT Kanpur

AUTONOMOUS UNDERWATER VEHICLE | MENTOR: PROF. MANGAL KOTHARI *Feb – July 2019*

- Implemented an Image Processing Algorithm (**Image Fusion**) to enhance the degraded underwater images in real time before feeding it to the perception module of the vehicle.
- Integrated **UUV Simulator**, an open source underwater simulator, to work with AUV-IITK code base.
- Designed and developed the software architecture for AUV consisting of dedicated layers for hardware integration, controls & navigation, motion planning, and perception using libraries such as **ROS, OpenCV & Gazebo**.

Skills

Languages	C, C++, JavaScript, Python, HTML, CSS, BASH, AWK, Verilog, Matlab/Octave, TypeScript
Utilities	ROS, OpenCV, Git, SolidWorks, Arduino, Gazebo, PyTorch, Angular, Tensorflow, Keras, GNU octave, Matlab, PyBullet , LaTeX
Interests	Image Processing, Computer Vision, Linux Command Line, Robotics, 3D simulation, Machine Learning

Relevant Coursework

Representation and Analysis of Random Signals (A*), Introduction to Machine Learning (A), Convex Optimization, Probability & Statistics (A), Data Structures & Algorithms, Essentials of Scientific Computing, Cyber Security of critical infrastructure, Principles of Communication System, Robot Manipulators: Dynamics and Controls, Formal Methods for Robotics and Automation
